Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 26, 28-29, 31, 33-34, and 36-37, are rejected under 35 U.S.C. 102(e) as being anticipated by Camhi et al as set forth in the previous Office Action mailed out on 12/1/05.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 2621

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 27, 30, 32, 35, and 38-41, are rejected under 35 U.S.C. 103(a) as being unpatentable over Camhi et al in view of Yonemitsu as set forth in the previous Office Action mailed out on 12/1/05.

Response to Arguments

6. Applicant's arguments filed 2/9/06 have been fully considered but they are not persuasive.

Regarding the Applicant's argument in that the cited reference of Camhi et al does not provide any discussion of any time delay, no discussion of any threshold, no discussion of any predetermined threshold, and no discussion of doing different things depending on the time delay anywhere in the specification, Examiner disagrees. It is noted that the cited prior art of Camhi et al does disclose an audiovisual recorder 10 which is configured to present the desired programming information to the user with a time delay effect by retrieving from the memory unit 12 and coupling (via outputs 24), the stored information to the user's display devices upon user actuation of playback key 20 (See col. 5, lines 25-35, col. 4, lines 59-66). This disclosure meets the claimed limitations of displaying a portion of the video stream at least initially delayed by a time delay". Moreover, by using the functions provided by the frame advance key 58 and the terminate key 60, the audiovisual recorder 10 is configured to continue presenting the stored information from the memory 12 to the user's display devices, and when a point where the interval of time delay becomes negligible is reached, to automatically

Art Unit: 2621

discontinue recording function and to revert to normal real time display of broadcast information (col.6, lines 50-col. 7, line 9, col. 9, lines 20-27). This disclosure meets the claimed limitations of displaying the video stream from the storage device when the time delay is greater than a predetermined threshold, and when the time delay is less than a predetermined threshold, displaying the video stream without storing said stream". The prior art teaching of "the point where the internal of time delay becomes negligible" is construed as the "predetermined threshold".

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
